Powermax Serpentine Pulley Kits -

The PowerMax Serpentine Pulley Kits have been designed to easily replace conventional single or dual V belt drive systems. Using a 10 rib serpentine pulley set and matching belt, this kit will increase your alternator performance, reduce belt noise & vibration and put an end to belt dust, belt squeal & belt slippage, forever!

The Limitations Have Been Removed!

No longer are boat owners limited to upgrading their standard alternator to 100 amps on a single V belt / pulley arrangement. With a Powermax Serpentine Kit, you can increase the alternator output to 200 amps or more! This upgrade will dramatically reduce engine run time while more thoroughly recharging your batteries!

Pulley Kits Available For:

Yanmar Marine Engines
Westerbeke Marine Engines
Volvo Marine Engines
Perkins Marine Engines
Other Engine Kits Are In The Works!
