PowerMax 150A High Output Alternator

PowerMax 150 Amp Alternator - 12VDC

The **PowerMax** alternator should be the first power source to consider when expanding on or upgrading your charging system.

A **PowerMax** delivers super-high output even at low engine RPM. In combination with a Smart Regulator, you can be sure that your **PowerMax** represents one of the most effective methods of charging your batteries. With 5 - 6 times more charging power than the standard alternator, a **PowerMax** provides reduced engine running time which saves on fuel consumption, noise, heat, and costly engine wear and tear.

PowerMax Features:

- Heavy Duty, High Performance Alternator
- Industry Standard Small Case Design
- Rated 150 AMPS S.A.E 70F
